

# Welcome to 3am Software's Home Page

*Consulting on NetBSD-related projects*

---

I (in my guise as 3am Software) have written drivers for various Network Adapters for [NetBSD](#). And my hobby has grown into my vocation; I've been doing NetBSD-related work exclusively for the past ten years.

Over that time I've done:

- drivers for DEC FDDI EISA and PCI FDDI Controllers
- drivers for DEC Ethernet PCI, ISA, and EISA based network cards
- reworked the PowerPC machinde specific code (merged code from multiple ports into a common version, reimplement a new pmap, revamped all the assembly code, etc.)
- added support for ARM11 cores
- added support for various board for mips, arm, and powerpc.

Thank you for perusing my web site.

Cheers,  
[Matt Thomas](#)
